BSCS Graduate with more than 1 Year Experience

Full Stack Developer

Visa Status: 2 Years Residence Visa

Objective

Experienced skilled Full Stack Developer with expertise in PHP, especially Laravel, jQuery, AJAX, and ObjectOriented PHP. Proficient in SQL schema design, API development, and MYSQL profiling. Adaptable and effective in client management, with a strong foundation in Bootstrap, HTML5, CSS, and jQuery.

Experience

Full Stack Laravel Developer | Apollo Telecom (Private) Ltd | 01 January 2023 – 25 February 2024

- Developed and maintained responsive web applications using modern frontend technologies such as HTML5, CSS3, JavaScript, and frameworks like Bootstrap.

- Designed and implemented backend systems using MySQL & Laravel, ensuring efficient data storage and retrieval.

- Collaborated with cross-functional teams including designers, product managers, and other developers to deliver high-quality software solutions within project deadlines.

- Participated in code reviews to ensure adherence to coding standards, maintainability, and scalability of the code base.

Major Project: Recovery Management System:

Collaborated with Apollo Telecom Private Ltd to develop RMS, achieving a 20% increase in recovery process efficiency. Designed and implemented features, reducing manual intervention by 15% and introducing automated workflows, decreasing process times by 25% and minimizing data entry errors. Enhanced user accessibility led to a 30% improvement in user adoption rates.

Freelance Developer:

1- **Weather Now - Personalized Weather App|**
   https://github.com/nabeelimrani/Weather_App.git

Developed Weather Now, a personalized weather app using Google API for accurate real-time updates. Integrated user-friendly features and efficient data caching for enhanced responsiveness.
