SUMMARY

As a highly skilled and experienced Full Stack Developer, I possess a strong knowledge of PHP web frameworks, particularly Laravel. I am proficient in jQuery and AJAX, and have a solid understanding of Object-Oriented Programming in PHP. With hands-on experience in SQL schema design, I am also familiar with APIs, MySQL profiling and query optimization.

My ability to learn quickly and adapt to a fast-paced environment makes me well-suited to work with new solutions. I am forward-thinking and open-minded, which allows me to bring fresh perspectives to complex challenges.

As an excellent communicator, I am able to deal with difficult clients or customers with ease. I have a solid understanding and hands-on experience with Bootstrap, and I possess excellent knowledge of HTML5, CSS, and jQuery.

With my strong technical expertise and interpersonal skills, I am confident in my ability to exceed expectations in any Full Stack Developer role.

Outside of work, I enjoy attending technology meetups, learning about new frameworks, and working on personal coding projects. Let's connect and discuss how I can help bring your next project to life!

EXPERIENCE

Full Stack Laravel Developer
ScrumAD
June 2023 - Present, Islamabad, Islāmābād, Pakistan · Remote

Associate Software Developer
Apollo Telecom (Pvt) Ltd.
January 2023 - Present, Pakistan · On-site
helped me get this job

PROJECTS

RMS (Recovery Management System) for Apollo Telecom
January 2023 - Present
Associated with Apollo Telecom (Pvt) Ltd.

Book Portal
June 2023 - June 2023
Book Portal is a powerful software project that combines CRUD operations and DataTables functionality for efficient book management. It allows administrators to perform Create, Read, Update, and Delete operations on books seamlessly. The integration of DataTables enhances the user interface, providing advanced searching, filtering, and pagination features for easy navigation and access to book data.

User Management System
June 2023 - June 2023
User Management System is a feature-rich software project that offers seamless authentication for admins and users. It supports CRUD operations using Ajax, ensuring efficient data management. The system incorporates SweetAlert for user-friendly alerts and notifications. Additionally, it leverages DataTables for enhanced searching and pagination, enabling swift data retrieval and navigation.
